P. Petra I **11** Addendum

Among the fragments of Inv. 74, which are published in this volume as **28**, there are some column fragments (Lt 1, Lt 2, Lt fr. 1, and Lt fr. 2), which do not seem to belong to **28** but rather to **11**, the wrapping of the bundle consisting of **6**–**10**. First, Inv. 74 was found in the immediate proximity of **6**–**11**. Second, the hand in these fragments and in **11** is the same, as is the interlinear space. Despite the likelihood of this connection, it is not possible to place the column fragments of Inv. 74 among the very fragmentary **11**. The fragments which are transcribed below are stored in the same Glass Plate (243) as **11**. In addition, there are several loose column fragments, each containing a few letters, which are stored in Glass Plate 264.
